

Freedom of the press, one of America's most important rights, will be totally undermined by allowing big media conglomerates to dominate the information landscape. Freedom of speech and public debate will be squelched if we are not even aware of the issues. The USA is not Korea where all radios can only receive state-operated programming. The USA is not the old U.S.S.R. either. PLEASE do not be swayed by commercial interests that will undermine important freedoms even if they are adamant that this is not their intention.
